Feed Module and Separation Roller Guidelines for the 3000 and 4000 Series Scanners Consumable Kits

The following table provides a guideline of how often to change the feed module, separation roller and tires. Extra tires are provided in the event one is damaged when replacing tires.

- **Feed Module and Separation Roller Tires:** tire life will vary depending upon paper types, environment and cleanliness. Nominal tire life is approximately 250,0000 documents, results will vary. Degradation of feeder performance, multiple feeds, stoppages, etc. indicate a need to change tires. Change all tires on the feed module and separation roller at the same time.
- **Feed Module and Separation Roller:** it is recommended that you install a new feed module and separation roller approximately every 4th tire change. Install a new feed module and separation roller at the same time.

NOTE: Replacement tires are used on the feed module and separation roller.
