Feed Module and Separator Module Guidelines for the Scan Station 500/700, s1220 Photo Scanner, PS400/PS800/PS450/PS50/PS55/PS80 Scanners, i2400, i2600, i2800 Scanners and the i100 / i200 / i1200 / i1300 / i1400 Series Scanners Consumables Kits

The following table provides a guideline of how often to change the feed module, separation roller, pre-separation pad and tires.

- **Feed module and separation roller tires:** tire life will vary depending upon paper types, environment and cleanliness. Nominal tire life is approximately 125,000 pages, results will vary. Degradation of feeder performance, multiple feeds, stoppages, etc. indicate a need to change tires. Change all tires on the feed module and separation roller at the same time.
- **Feed module and separation roller:** it is recommended that you install a new feed module and separation roller approximately every 4th tire change. Install a new feed module and separation roller at the same time.
- **Pre-separation pad:** change every other time you change the feed module, separation roller or change the tires.

NOTE: The replacement tires are for use with the feed module and the separation roller.
