

## **Kodak i5x50 Series Scanners ISIS Driver Update Release Notes** **ISIS Driver Version eki5200\_2.0.11607.14001 Summary**

**Purpose of Release:** This update corrects 6 issues found with the ISIS driver related to the Image Addressing feature. See Improvements below for more detail.

**Date:** April 15, 2016

### **New Features from version 2.0.11603.30001:**

1. none

### **Improvements from version 2.0.11603.30001:**

1. PR#26482: Image Address does not incremented in application properly
2. PR#26394: There is no way to Disable Power Off, add a checkbox and make it a global setting in configsettings.xml.
3. PR#26525: 2 digit Year date formats does not always print correctly.
4. PR#26667: Orthogonal Rotation not working.
5. Fixed userdefaults to configure multi-feed sensors.
6. PR #39699: There's no imprinter example displayed when "Indexing Presets" is enabled
7. Updated localization file for language translations.
8. PR # 26693: Changing from a profile with Level 2 Offset to a profile with Level 1 causes IA errors

### **Supported Models:**

- This driver has been tested and approved for use for uses with Kodak i5250, i5650 and, i5850 scanner.
- This driver will install on a computer and overwrite the ISIS drivers for a Kodak i5200, i5600 and i5800 scanner. This configuration has not been tested and is not approved for use. **This driver will not allow scanning to occur properly if it is used with a Kodak i5200, i5600 or i5800 scanners.**

### **Notes:**

- This is an update for the ISIS driver only and should be installed if the Scanning application uses the ISIS driver or Kofax Image Controls.
- The previous versions of the ISIS driver do not need to be uninstalled before installing this update. If the previous version is uninstalled, then this update will install the full version of the ISIS driver correctly.
- This ISIS driver update should be installed after the installation of the scanner drivers from CD 3.3.

## **ISIS Driver Version eki5200\_2.0.11603.30001 Summary**
