

KODAK E1000 Series Scanners Release Notes

Version CD 4.2.1 Summary

Purpose of Release: This is an updated release of the Kodak TWAIN driver for E1000 scanners with support for additional operating systems and Polish language support.

ONLY INSTALL THIS DRIVER VERSION IF THE SCANNING APPLICATION IS KNOWN TO SUPPORT THE KODAK BRANDED DRIVERS.

Note: The drivers only file, [InstallSoftware_E1000_v4.2.1.exe](#), does not include user guides or the required Microsoft .NET Framework files. This file can be used as the initial installation on a computer, as long as the .NET Framework has been installed. Windows 7, 8.1 and 10 include as standard the required .NET Framework.

The ISO image [CD_WINDOWS_ISO_E1000_v4.2.1.zip](#) is required for silent driver installation or an advanced (selectable) installation. Execute **set_up.exe /s** from the root of the ISO via the command line in order perform a silent/unattended install.

Instructions for installing drivers using the ISO file:

For Windows 8.1 and 10 OS, mount the ISO file as a drive (right click on the ISO file and select Mount). If Mount is not available in the list of options, right click on the ISO file, select Properties and change the Opens With to Windows Explorer and click OK. Mount will now appear with the right click of the ISO file.

For Windows 7 OS, either the ISO file has to be mounted as a drive or the ISO contents extracted to a folder using a 3rd party software tool. Software Tool providers (tools have not been tested and are not supported by the Kodak Alaris team, customers have reported that (7-zip, winrar, winiso)) offer such capability.
