Alaris Capture Pro Software - Version 5.7.0 Release Notes

Overview

Upgrading to Version 5.7.0

Additional Scanner Support

Enhancements and Problems Fixed in Version 5.7.0

Upgrading to Version 5.7.0 (1)

Upgrading Stand-Alone Installations

- The customer's **Capture Pro Software Serial Number** must be entitled to the 5.7 release
 - **The Entitlement Date (or Software Assurance Expiration Date) must be March 1, 2019 or later**
- To upgrade, download the installer (**CapProSW_5_7_0.exe**) file from www.kodakalaris.com/go/captureprodownload and run it.
 - **The installer will automatically upgrade an existing Capture Pro install to Version 5.7.0**
 - **An Internet connection is required during the upgrade as the Alaris licensing system will generate a new 5.7 license**

Upgrading to Version 5.7.0 (2)

Upgrading Network Edition Installations

- Both the NE Server and the NE Client workstations must be upgraded to Version 5.7 at the same time.
 - **You cannot run a Version 5.6 client workstation with a Version 5.7 NE Server**
 - **You cannot run a Version 5.7 client workstation with a Version 5.6 NE Server**
- To upgrade, download the installer files from www.alarisworld.com/go/capturepronedownload and run them
 - **IIS on the Network Edition Server must be STOPPED prior to the upgrade and RESTARTED after the upgrade**

Enhancements

Display Warning Message When Attempting to Delete an Image that Exceeds a Configurable Byte Size

- New **Workstation Setup** setting
- Helps prevent users from accidentally deleting images that should not be removed from the batch

The screenshot shows the 'Workstation Setup' dialog box with the following sections:

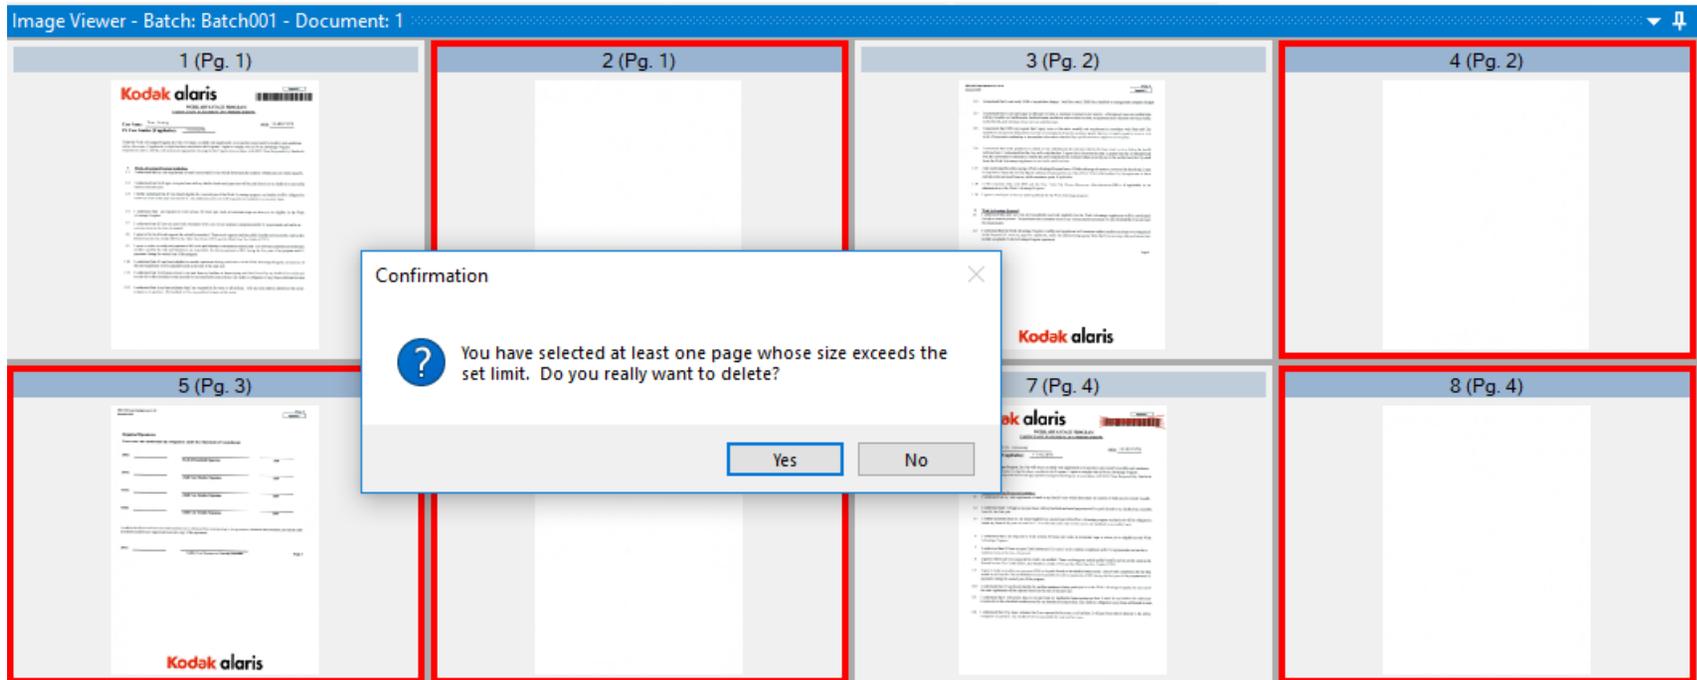

- Workstation:** ID: ; Name: ; Quick Start View
- Scanner:** Scanner family: ; Scanner model:
- Disk:** Disk warning level: MB
- Batch:** Enable Job level batch numbering; Display confirmation message before batch output
- Page:** Display confirmation message during manual deletion if page size exceeds KB

Buttons:

Enhancements

Display Warning Message When Attempting to Delete an Image that Exceeds a Configurable Byte Size

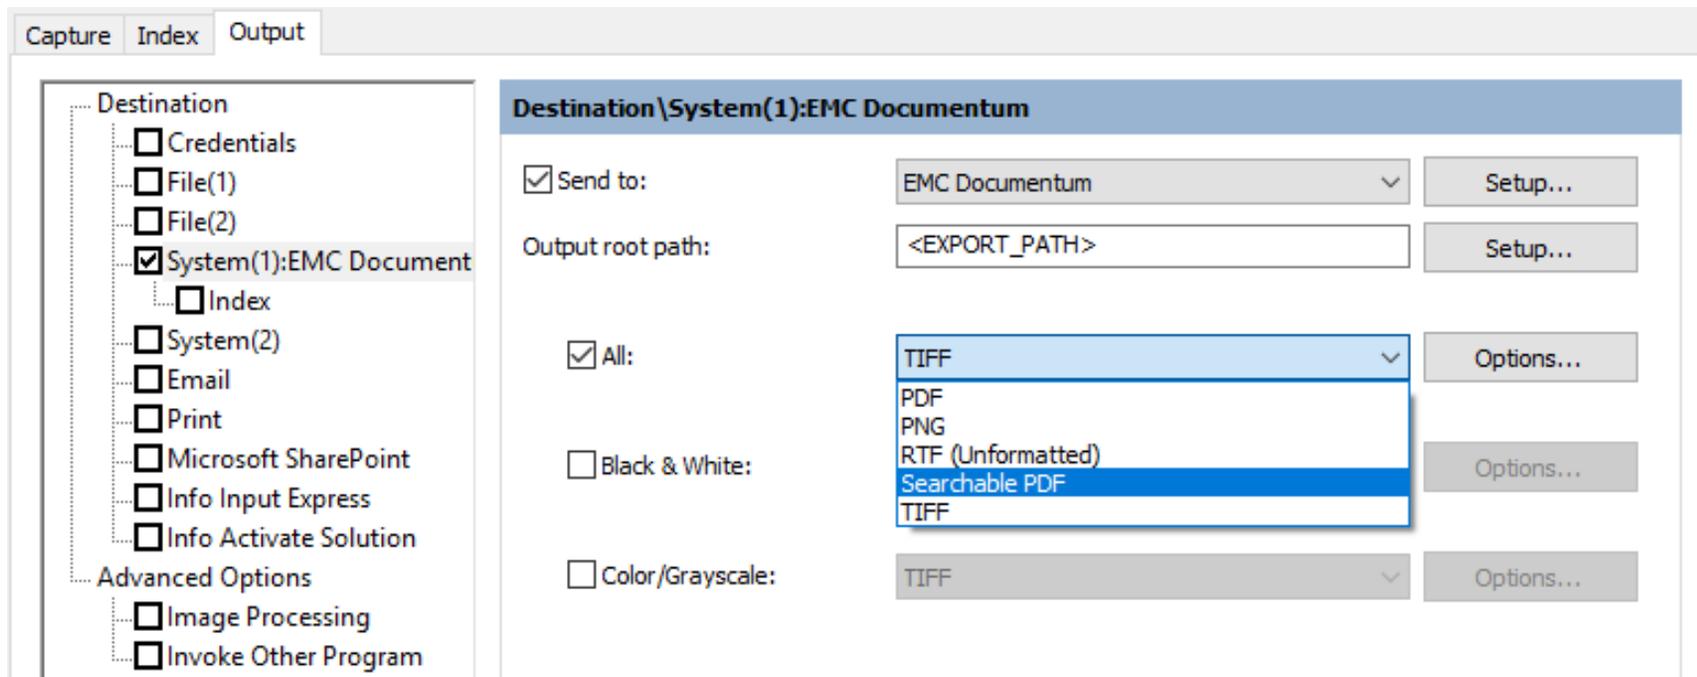

- User is given option to **Confirm or Cancel** the manual deletion

Enhancements

Searchable PDF Output added to Documentum System Output

- **PNG** and **Unformatted RTF** output have also been added

Problems Fixed in 5.7.0

Scanning

- **Cannot select "Kofax VRS Scanner" with VRS 5.1.x installed**
 - Error message displayed is "VRS 4.0 or later is required"
 - Problem was specific to Version 5.6.0
- **Cannot select or configure non-Alaris Scanners (non-English GUI)**
 - Problem was new to Version 5.6.0
 - In some cases, scanning is successful when the user GUI language is English
 - Reported on the following scanner models using ISIS drivers:
 - Canon DR-6010C
 - Fujitsu fi-5950 (Paperstream ISIS drivers used for Fujitsu scanners)
 - Fujitsu fi-6770
 - Fujitsu fi-6800
 - Fujitsu fi-7030
 - Fujitsu fi-7140/7240
 - Kodak Truper 3210
 - Panasonic KV-S5055C

Problems Fixed in 5.7.0 (continued)

Indexing

- **Capture Pro crashing** when DB Lookup from Oracle database has multiple results

Output

- **Outputting index data to an MS SQL database fails when user GUI language is non-English**
 - Reported by customers with Spanish and Swedish GUI users
- **Searchable PDF images may be deskewed** upon output when original image after scan is not

Network Edition

- **About dialog in NE Dashboard is reporting Version as 0.0.0**
