Kodak Capture Pro Release History

Note: "Software Assurance Date" (also known as "Entitlement Date") means that a license that is/was covered under a Software Assurance Agreement on that date is and will remain eligible to be upgraded to that software version at no charge, even if Software Assurance subsequently lapses.

Kodak Capture Pro v6.0 SW Assurance Date: March 1, 2022

- Support for Kodak S3120 Max and S3140 Max Scanners

- Windows 11 Support

- Windows Server 2022 support

    o Network Edition Server and Remote Output Server
    o Auto Import (including running as a Service)

- Security Updates
    o Update outdated libraries
    o Remove dependency of .NET Framework 3.5
    o Full support of TLS 1.2 when TLS 1.0 and 1.1 have been deprecated

- SharePoint Online Modern Authentication (full version only)

- Outlook 64-bit email Output

- Mark Images for Deletion

- PDF/UA (Universal Accessibility) Output

- Network Edition Changes
    o Removed Silverlight dependency for Network Edition Dashboard
    o KCPNEServiceUser not required to be in Administrators Group

Kodak Capture Pro v5.9 SW Assurance Date: March 1, 2021

- Vietnamese OCR support

- Last Document scanning
    o Option to ensure that all newly scanned pages are appended to the last document in the batch

- Support for Polish and Czech Scanner Driver Translations

- TLS 1.2 Support for Capture Pro Network Edition

- Automatic Restart

Kodak Capture Pro v5.8 SW Assurance Date: September 1, 2020

- Support for KODAK-branded E1000, S2000, and S2000W Series Scanners

- Support for KODAK S2085f and S3000 Series Scanners

- Corrections for Polish language GUI issues

- SharePoint Online output to document libraries with over 5000 documents

Alaris Capture Pro v5.7 SW Assurance Date: March 1, 2019

- Support for Alaris E1025 and E1035 Scanners

- Windows Server 2019 support
    - o Network Edition Server
    - o Auto Import (including running as a Service)

- HTTPS Support in Capture Pro Network Edition and Remote Output Server

- Searchable PDF support for **Documentum** System Output Destination

- Ability to set PDF Properties (Title, Author, Subject, Keywords) when using a System Output Destination

- Display warning message when attempting to delete an image that exceeds a configurable byte Size

Alaris Capture Pro v5.6 SW Assurance Date: August 1, 2018

- Support for Alaris S2040 Scanner

- New **Subscription based pricing and offering** for all Capture Pro products
    - o 1 Year with Software Assurance
    - o Groups A-G and Index Only
    - o Auto Import
    - o Network Edition Server and Clients
    - o Remote Output Server

- Updated **DocuWare** System Output Destination
    - o Works with DocuWare Version 6.6 or higher
    - o Produces XML index files in the **DocuWare DWCONTROL** format

Alaris Capture Pro v5.5 SW Assurance Date: September 1, 2017

- Support for Alaris S2000 Series Scanners
    - o Ability to configure up to 20 button short-cuts
    - o Multi-user/multi-PC support of the S2060w and S2080w scanners

- Intelligent Job Select support for all Alaris and Kodak scanners
    - o Previously known as Feature Patch for the i5x50 Scanners only
    - o Provides the ability to switch Job Setups and Page Setups on-the-fly during scanning

- Support for Windows Server 2016 for Capture Pro Auto Import and Network Edition

- PDF/A-3a output

- JPEG output with ICC Profile information

Kodak Capture Pro v5.4 SW Assurance Date: May 1, 2017

- Ability to assign index data to the Properties of output PDF files:

    - o Title, Author, Subject, and Keywords

- Ability to assign the result (TRUE or FALSE) of a Database Lookup Validation to an index field

- Intelligent Exception Processing on-the-fly during scanning for all Kodak Alaris scanners

    - o User gets immediately notified right after the exception page is scanned (e.g., wrong document, missing signature, document already scanned)

- New API for Database Lookup

- New Document Import API

- New Generic OCR API enabling integration of other OCR engines

Kodak Capture Pro v5.3 SW Assurance Date: November 1, 2016

- Support of Kodak Alaris scanner bar code reading

  For scanners that perform bar code reading in the scanner hardware (i4x50 and i5x50 Scanners), the advantages are:

  - o More accurate bar code read results on challenging bar codes due to bar code reading performed on higher resolution images before image downscaling and iThresholding etc…
  - o Better throughput on bar codes that could cause slow downs when read in software in Capture Pro (e.g., QR Codes)

- Support for Kodak i5650S and i5850S scanners

- Stop on Feature Patch for Kodak i5x50 scanners

  - o Ability to switch Job Setup or Page Setup on-the-fly during scanning without operator intervention

- Optional PDF Import engine for handling other types of PDFs (e.g., fill-in forms)

- Output e-mail with multiple attachments

- Double Data Entry indexing on bar code/OCR index fields

- NEW and improved **Prompt on Output** and **Cabinet** system output destinations

Kodak Capture Pro v5.2 SW Assurance Date: April 1, 2016

- Integration with Info Input Express

- Support for Kodak i3300 and i3500 Scanners

- Support for Kodak i1150WN and i1190WN wireless scanners

- Support for Kodak i5x50 Scanners

Kodak Capture Pro v5.1 SW Assurance Date: September 1, 2015

- Windows 10 support

- Support for Kodak i2x20 and i4x50 Scanners

- Active Directory support - Windows Users that belong to an Active Directory group will automatically be assigned to the corresponding Group in Capture Pro

- Output to SharePoint Online (i.e., Office 365)

- Point-and-Click OCR Indexing

- Ability to define Page Setups (including default) for a Job Setup

- Ability to perform Bar Code and OCR indexing on attachment pages of a document

- PDF Output Enhancements

    o Support for PDF Version 1.7

    o 128-bit and 256-bit AES encryption support

    o Full PDF/A-1a and 1b and PDF/A-2a support

- New Overwrite option for File-based output

- Output to Abbyy Recognition Server – customer must have their own Abbyy Recognition Server license

- Configurable Image Stamping Size on output

- Ability to control what Setup files are synchronized (or not) with Network Edition

Kodak Capture Pro v5.0 SW Assurance Date: September 1, 2014

- "Big Button" Quick Start GUI

- Automated software assurance renewal reminders

- LZW compression for Tiff images

- Multiple document splits with one operation

- Copy and paste images across documents

- Support of Windows 8.1 OS

- Option to auto-delete first page of every document on output

Kodak Capture Pro v4.5 SW Assurance Date: October 1, 2013

- Mark Detection (OMR) Indexing

- Secure FTP output

- Alfresco SOD

- Output batch statistics and document/batch index information to an ODBC database

- PDF Bookmarks on output

- Silent install without requiring connection to Kodak Alaris license server

- Integration with Kodak Info Activate Solution

- Find all bar codes on a page

Kodak Capture Pro v4.1 SW Assurance Date: December 1, 2012

- More intuitive installation program

- Support for Kodak i2900, i3200 and i3400 as well as other 3rd party scanners

- Fujitsu and Canon scanner group changes (lower group licenses can now be used)

Group Changes

Fujitsu fi-5950	from	Group F	to	Group E
Fujitsu fi-6670	from	Group E	to	Group DX
Fujitsu fi-6770	from	Group E	to	Group DX
Canon DR-7550C	from	Group E	to	Group DX

- Arabic OCR is now integrated with Capture Pro and is available as an accessory for additional charge

- Print Batch Cover sheet with all types of configurable Batch Information is now available

- Enhanced Intelligent QC throughput, especially with large batches

- Enhanced QR Type Bar Code reading – especially when a bar code contains multiple language text

- Improved Network Edition Auto Import communications – Auto Import clients can now auto renew their license with the server without any operator intervention

- Improved Remote Batch Output Processing for Searchable PDF files to improve speed

- Improved creation of large searchable PDF files – even faster than before!

Kodak Capture Pro v4.0 SW Assurance Date: May 1, 2012

- Virtual product delivery and licensing - no more DVDs or hardware keys required (though still available as options)

- Began Bundling Software License, Software Assurance and Start Up Assistance Professional Services with one catalog number

- Network Edition Trial Licenses are also now available by request for the first time

- New Double Data Entry Indexing is now available

- Database Look Up Indexing now supports 1 or 2 Key Index fields for look ups

- Improved Intelligent QC support with Auto Crop and Deskew and "Apply to all" images capability

- Improved PDF Output options including support for longer documents, Fast Web View PDFs, password-encrypted PDFs and faster creation of PDF MRC and PDF Archive (i.e., PDF/A) type files

- Main Screen magnifying glass tool and selector tool functionality is combined into the new magnifying tool

- 1MB blank page file size limitation is removed in Remove Blank Images

- The Batch manager screen can be disabled at software startup and enabled after a batch is output

- New Batch Dialog box can be disabled after a batch is output

- Daily Reset counter option is added to Batch Naming setup and Batch Number and Scanner Counter can be auto reset each new day for each new job

- Support for Aztec 2 dimensional bar codes is added

- Updated bar code engine improves read rates with Code 93, Code 128, PDF 417 and Data Matrix bar codes

- Option added to suppress Scanner Error Messages from the Capture Pro User Interface as requested by System Integrators

- Documentum and Papervision Batch Output Formats are improved

Kodak Capture Pro v3.1 SW Assurance Date: May 2, 2011

- Added Arabic Language support

- New enhanced version of the Bar Code engine including a Filter setting that can help read poorer quality bar codes

- Improved Auto Import capabilities including ability to assign Folder Name to an index field value

- Added hot keys to the Batch Explorer

- Image Blanking can now be done in either White or Black

- Remote Output Server can now be installed on the same physical server as the Main Network Edition server

Kodak Capture Pro v3.0 SW Assurance Date: December 15, 2010

- Added Intelligent QC feature, which allows image adjustment without rescan

- Improved SharePoint support with the SharePoint Setup Wizard

- Improved Drop-Down List support including ability to Import a Drop-Down List from SharePoint or ODBC Database and ability to select multiple values

- Added support for Microsoft Server 2003 32 Bit SP1 and 64 Bit and Server 2008 64 Bit

- Added QR Bar Code support

- Added support for UNC path names and Fully Qualified Path names for Auto Import Hot Folders

- Added ODBC (Open Data Base Connectivity) Output Format (Output to a database)

- Added support for iVault output

Kodak Capture Pro v2.5 SW Assurance Date: March 17, 2010

- Auto Import Edition – Stand Alone Auto Import License created

- Auto Import Improvements including Auto-Start Polling, document separation by sub-folder and per file, and ability to assign File Name of imported files to an index field

- Rich Text Format and Text Output formats in addition to TIF, JPEG and PDF formats

- Enhanced Digital Image Stamping and Bates numbering (now fully configurable)

- New Index Data API created for advanced integrations

- Windows 7 (32 and 64 bit) support

- New DX License Group added

- User Guide available in 5 languages (English, German, Japanese, Spanish and Portuguese)

- OCR can be optimized for Speed vs. Accuracy with 5 setting combinations

- Custom OCR dictionaries and secondary language support added

- Added IMB – Intelligent Mail Barcode support (new bar code type added)

- Added PDF File import for both Manual and Auto Imports

- Added SharePoint 2010 support for image and data output

- Invoke Other Program enhancements

- Key Data Entry LAST VALUE indexing

- System Output improvements for Kofax Ascent and Mobius

Kodak Capture Pro v2.0 SW Assurance Date: August 31, 2009

- Added Database Look Up (via ODBC) capability for indexing

- Rescan and Rotate with the scanner enabled

- System Output API updated – output can be directed by file type (e.g., Bitonal, Color/Gray)

- System Output web site created which includes SODs developed by partners

- Improved SharePoint output including Index Field Mapping and Capture Pro component no longer needs to be installed on the customer's SharePoint Server

- Added EMC Documentum system output

- Added output to FTP sites

- Code 39 Extended bar code support

- PDF User's Guide

- Auto Import capability added (standard with Group E, F and G licenses)

Kodak Capture Pro v1.1 SW Assurance Date: November 30, 2008

- Support for 160 3rd party Scanners using ISIS drivers

- Still Supports Kodak scanners using the TWAIN drivers

- Added scanner adjustment toolbar for Kodak Scanners

- Added Russian, Czech and Turkish language support

- Added one index file per document like Capture Software 6.x

- Improved SharePoint output including support for Microsoft SharePoint Secure server, Port Numbers and Domain Names

Kodak Capture Pro v1.0 Released April 2008

- Initial product launch

- Basic scanning, indexing and output

- Supported Kodak scanners only using TWAIN drivers
